DETAILED ACTION

Claim Rejections - 35 USC § 112

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Claims 22-25, 27-29 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

In Claim 22, lines 2-3 and 13-14, the phrase "such as insects" renders the claim indefinite because it is unclear whether Applicant is claiming insects or is not claiming insects.

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless -

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claim 22 is rejected under 35 U.S.C. 102(b) as being anticipated by Smith (US 5,555,673).

As to Claim 22, Smith discloses a method of eliminating unwanted vegetative growth with a herbicide (col. 4 lines 10-46; abstract) or controlling crawling pests such as insects when a pesticide is used (col. 4 lines 10-46; abstract) comprising providing a compound comprising either a herbicide or pesticide compound in a reservoir (col. 4 line 24; 28 of Fig. 2); selectively delivering the compound to an applicator by increasing internal pressure of the reservoir forcing

Page 3

Art Unit: 3643

through a regulatable valve (col. 4 lines 30-33); directly contacting a surface with the applicator (col. 4 lines 25-29); regulating the flow of the compound delivered by the applicator by varying the internal pressure or the regulatable valve (col. 4 lines 30-33); wherein the step of directly contacting a surface comprises contacting unwanted vegetation when a herbicide is in the reservoir (col. 4 lines 35-40; abstract), and wherein the step of directly contacting a surface comprises contacting a surface which crawling pests such as insects can cross when a pesticide is in the reservoir (col. 4 lines 35-40; abstract),

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negatived by the manner in which the invention was made.

Claim 23 are rejected under 35 U.S.C. 103(a) as being unpatentable over Smith (US 5,555,673).

As to Claim 23, the limitations of Claim 22 are disclosed as described above. Not disclosed is the use of oil-based herbicides. Examiner takes official notice that it is old and notoriously well known in the pesticides art to use oil base herbicides in herbicide applicators are use. It would have been obvious to one of ordinary skill in the art at the time of the invention to modify the method of Smith by using the apparatus with oil-based herbicides so as to apply the desired and most effective herbicide.

Application/Control Number: 09/689,459

Art Unit: 3643

Claims 24, 25, 27, 28, and 29 are rejected under 35 U.S.C. 103(a) as being unpatentable over Smith (US 5,555,673) in view of Ostrowsky (US 3,993,208).

As to Claim 24, the limitations of Claim 22 are disclosed as described above. Not disclosed is a safety cover means with securing means of rotating the cover means past a predetermined stop to block reverse rotation. Ostrowsky, however, discloses the use of a cover means (36 of Fig. 1) with a securing means (20 and 51 of Fig. 1) of rotating the cover means past a predetermined stop to block reverse rotation. It would have been obvious to one of ordinary skill in the art at the time of the invention to modify the method of Smith by including a cover means with securing means that blocks reverse rotation as disclosed by Ostrowsky so as to deny access to children (see Ostrowsky col. 1 lines 5-10).

As to Claim 25, Smith as modified by Ostrowsky further disclose application of a positive force to a portion of the cover means to enable forward rotation to release it from the reservoir (see Ostrowsky col. 4 lines 12-33; inherent in Fig. 1 of Ostrowsky).

As to Claim 27, Smith as modified by Ostrowsky further disclose a step of removing from the applicator an overcap which selectively covers the applicator (inherent in Fig. 1of Ostrowsky).

As to Claim 28, the limitations of Claim 22 are disclosed as described above. Not disclosed are a safety cover means that fits on the reservoir and is rotatable past a predetermined stop to block reverse rotation. Ostrowsky, however, discloses the use of a cover means (36 of Fig. 1) that fits on a reservoir (10 of Fig. 1) with a securing means (20 and 51 of Fig. 1) of rotating the cover means past a predetermined stop to block reverse rotation. It would have been obvious to one of ordinary skill in the art at the time of the invention to modify the method of

Art Unit: 3643

Smith by including a cover means with securing means that blocks reverse rotation as disclosed by Ostrowsky so as to deny access to children (see Ostrowsky col. 1 lines 5-10).

Page 5

As to Claim 29, Smith as modified by Ostrowsky further disclose application of a force to a portion of the cover means to enable forward rotation to release it from the reservoir (see Ostrowsky col. 4 lines 12-33; inherent in Fig. 1 of Ostrowsky).

Response to Arguments

Applicant's arguments with respect to claim22-25 and 27-29 have been considered but are moot in view of the new ground(s) of rejection.

Conclusion

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Waldmann discloses in the prior art an applicator with reservoir and brush.

Any inquiry concerning this communication or earlier communications from the Examiner should be directed to Jeffrey L. Gellner whose telephone number is 703.305.0053. The Examiner can normally be reached Monday through Thursday from 8:30 am to 4:00 pm. The Examiner can also be reached on alternate Fridays.

If attempts to reach the Examiner by telephone are unsuccessful, the Examiner's Supervisor, Peter Poon, can be reached at 703.308.2574. The fax phone numbers for the Technology Center where this application or proceeding is assigned are 703.305.7687, 703.305.3597, and 703.306.4195.

Art Unit: 3643

Any inquiry of a general nature or relating to the status of this application or proceeding should be directed to the receptionist whose telephone number is 703.308.1113.
